

Stop absorbing chaos. Install the grid.

LGP helps owner-led organizations stabilize finance, illuminate waste, redesign workflows, and activate practical AI where it actually saves time.

AI

Not chatbot AI.

Operational AI for workflows, reports, handoffs, and decisions.

When the business feels chaotic, do not add another app. Build a clearer grid.

When to bring in LGP

Cash risk

Low visibility, payroll pressure, or weak cash rhythm.

Untrusted reporting

Books, close process, or dashboards are not decision-ready.

Manual work everywhere

Duplicate tasks, spreadsheets, inbox handoffs, and rework.

Team friction

Unclear ownership, weak accountability, or culture drag.

The LGP path

01

Stabilization Sprint

2 weeks

Cash stress, payroll risk, reporting breakdown, or chaos.

02

Lumen Power Audit

2-3 weeks

Find waste, leakage, bottlenecks, and AI opportunities.

03

Lumen Grid Build

60-90 days

Install SOPs, dashboards, reporting rhythm, and automations.

04

Command Center

Monthly

Review KPIs, optimize AI, improve handoffs, and keep momentum.

What your team receives

- Decision-ready finance and cash visibility
- Workflow maps, SOPs, and role clarity
- Waste, spend, and savings opportunities
- Automation and AI opportunity matrix
- 30/60/90-day Power Plan

What makes LGP different

Human judgment first. AI with guardrails. Systems that stick. LGP combines finance leadership, workflow redesign, practical implementation, and AI as the operating layer - not the offer itself.

Start with the Lumen Power Audit.

A focused diagnostic reveals where time, money, energy, and profit are leaking.
